Hi [[firstname]],

A quick question for you...
Is your life on hold?

You know, I used to put so many things off. Sometimes, it was a lack of cash and other times it was a lack of time. Most of the time I was just overwhelmed with my job and life - not being able to take the time I wanted to do the things I really enjoy.

Are you longing for the day when you will be in control - when you will have all the time and money you will need - so you can spend your life as you wish?

If so, then your life is on hold for you can have that now.

The sad fact is that most people spend most of their lives on hold - longing for the day when they can live as they please because they have all the time and money they need.

Life is too short to spend it on hold, [[firstname]].

The good news is that you don't have to spend your life on hold! Thousands of people just like you have discovered us. We work with a company that enables ordinary people to achieve their lifetime dreams and goals in a short period of time. We have been doing this for 50 straight years!

Many of our people enjoy a raise every month. It's called: "Lifetime Residual Income".

Is that better than what you've got now?
How would it affect your life if you got a \$50, \$100 or \$250 raise every month?

The choice is yours, [[firstname]]. You can keep doing what you've already been doing -- and keep getting what you're already getting...

- or -

you can start part-time with us while you keep your present job.

You don't have to leave your present job to join us because the power is in your hands. You will have control of your personal life and the income level you want. Isn't that the way it should be?

It only takes a few minutes to take a quick look now.
You won't regret it!
